

# CABLE & WIRING SOLUTIONS

STS Defence is a world-class, dynamic and customer focused SME who provide a range of electronic and electro-mechanical manufacturing services to the Defence & Security, Aerospace and Marine markets.

Above all we offer flexibility by providing tailored solutions through our design, engineering, procurement and manufacturing skills to supply high quality yet cost effective solutions that fulfil our customer requirements.

## Key capabilities include:

- ◆ Aerospace wiring looms
- ◆ Harsh environment cable and connector solutions
- ◆ Cable Braiding - Steel, Copper and Nomex
- ◆ Fibre Optic cable assembly
- ◆ Mixed technology and complexity
- ◆ Nadcap AC7121 - Cable and Harness Assembly

With over 50 years experience in the design, manufacture, supply and repair of aircraft looms and specialised subsea cables, we offer a complete range of cable and wiring solutions. As the first company outside of North America to achieve Nadcap AC7121 accreditation for Cable and Harness Manufacture, this clearly demonstrates our commitment to quality and workmanship of the highest standard.

From initial concept through to complete product installation we can provide a range of services to deliver simple loom assemblies through to complex and bespoke wiring harnesses.
