

FABRICATION & FINISHING

STS Defence is a world-class, dynamic and customer focused SME who provide a range of electronic and electro-mechanical manufacturing services to the Defence & Security, Aerospace and Marine markets.

Above all we offer flexibility by providing tailored solutions through our design, engineering, procurement and manufacturing skills to supply high quality yet cost effective solutions that fulfil our customer requirements.

Key capabilities include:

- Light to medium Fabrication services
- Dedicated workshops to support business
- Paint facilities - Wet, Dry, Powder and Stove
- Coded Welders
- Ruggedised cases and storage solutions
- Design & Installation support

The Fabrication department and its dedicated workshop, is situated under the same roof as the other manufacturing services of STS Defence. This capability complements and supports the remainder of the business thus allowing the manufacture of entire electronic assemblies to be efficiently built on the same site.

With many years experience of producing metal enclosures, ruggedised cases, ships furniture and other bespoke structures for the Defence & Aerospace markets. STS Defence can also provide design and installation support. Both prototype and volume manufacture can be accommodated.
