

Patching Solutions

19" equipment rack, housing six and eight way patch panels

STS Defence Limited provides a wide range of patch panels for 19" rack mounted applications. Units consist of six or eight way patch panels adopting MIL-C-D3999 'thro-bulkhead' connectors.

Manufactured to a high standard, each patch panel is 2U in height and conforms to current TEMPEST regulations and MoD Defence Standards.

Constructed from aluminium and finished (front face only) with a powder coating spray paint for a durable surface. Rear face clean (bright, uncoated to NES 1005/8-1) in accordance with the General Design Requirements for Naval Weapon Equipment.

Bespoke panels are available on request for compatibility with other patching systems. (Outfit RWE/RWC, MIL-C-5015, Pattern 105/104 connectors) or to satisfy specific customer requirements.

- Constructed to MoD Specifications
- Conforms to Def-Stan 08-50, 21-27 & 09-107
- Compatible with 19" racking
- Nato Codified
- Robust, lightweight, non magnetic
- High quality damage resistant finish.
