

# PCB ASSEMBLY

STS Defence is a world-class, dynamic and customer focused SME who provide a range of electronic and electro-mechanical manufacturing services to the Defence & Security, Aerospace and Marine markets.

Above all we offer flexibility by providing tailored solutions through our design, engineering, procurement and manufacturing skills to supply high quality yet cost effective solutions that fulfill our customer requirements.

## Key capabilities include:

- ◆ SMT and Conventional Assembly
- ◆ Automatic and bespoke test solutions
- ◆ Conformal coating and encapsulation
- ◆ Environmental Stress Screening
- ◆ Prototype service
- ◆ Obsolescence management and legacy support
- ◆ Nadcap AC7120 - Circuit Card Assembly

With a range of skills, expertise and equipment, STS Defence are able to offer a range of services from single board prototypes to high volume production. Working with our customers, we can provide initial design through to legacy support and repair, together with flexible capacity and obsolescence management that will minimise risk and provide cost-effective solutions.

As the first UK based company to achieve Nadcap AC7120 accreditation for Circuit Card Assembly, this clearly demonstrates our commitment to quality and workmanship of the highest standard.
